Welcome to your Rockingham County ACEs Connection Community Tracker!

What is this?
This tracker measures the progress of your ACEs initiative. It maps ACEs science presentations by location, sector, subsector, date and presenter.

How can you use this tracker?
Your initiative can make sure it’s tailoring outreach efforts across all sectors, subsectors and geographic areas of your community. And you can troubleshoot around barriers to educating and engaging organizations that are not yet connected with your local ACEs initiative. Best of all, organizations can use the tracker to work together to share strategies and build cross-sector collaborations with the goal to become a self-healing community.
